-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-5, 8 and 10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims and 5 of U.S. Patent No. 6,474,090 in view of Johnson (5,026,432) and Teague (5,180,105) and GROSSCHWEISWERK UND DAMPFKEESSE (DE004226890A1). Claim 1 and 2 of The U S Patent 6,474,090 reads claim 1 and 5 of The Applicant respectively except production of external noise levels up to around 90 decibels measured three feet from the machine for claim 1. Johnson teaches to maintain a noise level below 85 dB (decibels)/(around 90 decibels) in a Turbo air mover 86 to move air by an airflow of 500 standard cubic feet per minute. The noise level below 85 dB as disclosed above by Johnson reads claims 2-4. The outer case material, size, shape of Johnson also reduces noise level and read claim 10. See Fig 7 and column 8, lines 18-28. Teague reads claim 8. See column 1, lines 27-29 and GROSSCHWEISWERK UND DAMPFKESSE teaches the use of noise damper nozzle and reads claim 9 (see the

abstract). Regarding the noise level from a distance of three feet is a normal distance from the source of the noise to be considered and the consideration of similar distance is obvious for the others who disclosed the dB without mentioning the distance from the source of the noise.

***Allowable Subject Matter***

Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
